SUMMARY

Disciplined and highly motivated Java developer who is dedicated into acquiring and mastering the concepts such as Java programming and backend services development as a whole.

In terms of technical skills, I'm proficient in OOP with Java, as well as SQL, RESTful API development and software testing, and familiar with frameworks such as Spring Boot, Spring Security, Spring Data JDBC, React and Maven.

Highly dedicated into acquiring new skills in the software development field, keeping up to date with the latest technologies and practices. I am looking for new challenging and exciting ways to further build up on my skill set, as well as bring expertise and enthusiasm to a dynamic team.

I'm currently seeking a challenging and rewarding backend Java developer position, where I can contribute my skills, learn from experienced professionals, and grow as a developer.
