SUMMARY

Disciplined and highly motivated Java developer who has dedicated countless hours to studying and mastering the concepts of Java programming and backend development.

In terms of technical skills, I'm proficient in OOP with Java, as well as SQL, RESTful API development and software testing, and familiar with frameworks such as Spring Boot, Spring Security, Spring Data JDBC, React and Maven.

What really sets me apart is my passion for learning and staying up-to-date with the latest technologies and best practices in the industry. I'm always looking for opportunities to expand my knowledge and skills, and I'm eager to bring this enthusiasm to a dynamic team.

I'm currently seeking a challenging and rewarding backend Java developer position, where I can contribute my skills, learn from experienced professionals, and grow as a developer.
